

No more disposable cups! Soft reusable cups can be folded away easily and taken along with you during a race. They are ultra compressible and super lightweight. These cups allow people to get their own water during the race, reducing disposable, single-use plastic cups at your event.

- Easy to hydrate quickly with a wide opening.
- Made from BPA-Free Biodegradable Food Grade TPU (Thermoplastic Polyurethane).
- Size is 10 x 6.5cm with a capacity of 200ml.
- Pricing includes one silkscreen logo.
- See the last page of this document for available colours.

Prices are exclusive of GST

Stay hydrated as you run with these soft and flexible 250ml flasks. They can be branded for your event and are perfect to give to your participants to fill up during their race. Using reusable flasks helps reduce disposable, single-use plastics at your event.

- High flow value making it easy to drink.
- The size shrinks as you drink to minimise any water bouncing.
- Size is 22 x 7.5cm with a capacity of 250ml.
- Pricing includes one silkscreen logo.
- Made from BPA-Free Biodegradable Food Grade TPU (Thermoplastic Polyurethane).
- See the last page of this document for available colours.
- These flasks are also available in 400ml and 500ml sizes. Please contact us for a quote.

Biodegradable TPU (Thermoplastic Polyurethane) is an advanced material that is much more environmentally friendly than alternatives such as PVC, TPU is durable, recyclable and biodegradable in 3 - 5 years.

Besides its manufacturing process, TPU also has some significant advantages over PVC including:

- Greater flexibility and excellent strength
- Lighter weight
- Abrasion resistant
- Resistance to oil and solvents
- Resistant to ageing and cracking (unlike the rest of us!)
- UV resistant
- More sustainable
